Dear Joel,

I and mine are well and hope you and yours are likewise. The point and necessity of this letter is the quiver. Enclosed is a nominal sum for purchase of said instrument. Needless to say, Kitty and I are deeply grateful for your ^{interest in this} ~~kind letter~~ matter. Thanks to you and all.

We are studying German from a grammar now. It is called A New German Grammar and the English part is easy going.

Otherwise all is strictly in a nut as to speak.

Thanks again,

Dear Puss,

Your letter was a delight to read so full of happiness and good clear news. I even smiled indulgently over it. Am glad you are in good shape and that Jeremy is growing up so nicely. (Have you received any diapers yet from Pell?)

By all means add the finishing touch to Al's mail and toil by presenting him with a classic tome calculated to keep him occupied for the next twenty years. I can recommend no better candidate for such an honor than

P. A. M. Dirac "The Principles of Quantum Mechanics" - Oxford University Press - 1935

(also 4th ed.).
 Convenient place to get it from is University Book Export Co.
 45 East 17th St
 New York 3, N.Y.
 (they give about 15% discount).

A smaller but charming volume is

A. Einstein - "The Meaning of Relativity" - Princeton University Press - 1945.

If I can do anything about helping out let me know. Sends love to all of you.

Spago is in town & looking well.

Regards.

Love,
 Bill

Hope you're settled & living in the style that we would
like to be accustomed to. Enclosed are some things that came
for you. Let us hope they are worth the cost of the higher postage
that may be required in this letter. A telephone bill also came which
I plan to take care of as a devotional indication in small part of my
appreciation in being ~~allowed~~ invited to be your guest in your N.Y.
residence. Amen. (Landlord still quiescent as regards me).

I heard & saw Beth at the Pimp. M. meeting. He's hot stuff all

It's when you write to Fargo. Will you inform her that we

Dear Al,

Thanks for the check. It came in mighty handy inasmuch as I happened to be in need of some petty cash at the moment. Enclosed is what I hope is an iron clad bill of sale for my few sticks and stones.

Of course thanks for the use of them, that's why you got them so cheaply. Have you heard from Galosh? So far all quiet here. Enough of this earthly discourse.

I'm taking quantum mech. under H.A. Kramers (pupil of Bohr, chairman of Scientific committee, Un. Nat. Atom. En. Comm.). Looks like a wonderful course also Atomic Physics under Rabi, General Physiology under Selig Hecht (I think of this as What is Life?), Partial diff. eq. under Kopyman, and a lab. physics course in which I'll do mainly optics experiments. Looks like ^{pleasant} much work this term.

How's by you? Write and tell all. Love to Russ and regards to Mr. & Mrs. Ross.

Your unworthy colleague,
Al-

I just noticed a magazine article that the first use of a magnifying glass was in 1867.

Enclosed is a letter. I also have one for George. When shall I send it? You were about to mention (I think) to me. Also Bread & Butter. So you want this stuff?

The following pieces of furniture are hereby sold to Alfred Sarant,
of 65 Morton St., N. Y. C., by William Perl, of Cleveland, Ohio, for
the sum of one hundred and twenty dollars received Sept. 30, 1946:

One chest of drawers
One bureau
One love seat
One radio
One tea cart
Two chairs
One maple arm chair
One mattress

Joe

Dear Puss,

your letter was a delight to read so full of happiness and good cheer. I even smiled indulgently over it. Am glad you are in good shape and that Jeremy is growing up so nicely. (Has you received any draper yet from Joel?)

By all means add the finishing touch to Al's mail and toil by presenting him with a classic tome calculated to keep him occupied for the next twenty years. I can recommend no better candidate for such an honor than

P. A. M. Dirac "The Principles of Quantum Mechanics" - Oxford University Press - 1935

(1st + 2nd ed.).
convenient place to get it from is University Book Export Co.
45 East 17th St
New York 3, N.Y.

(I give about 15% discount)

A smaller but charming volume is

A. Einstein - "The Meaning of Relativity" - Princeton University Press - 1945.

If I can do anything about the jury duty let me know. sounds like a lost 7.00 clock.

Aggie is in town & looking well.

Regards.

Love

Bill

Dear Joel,

I and mine as well and hope you and yours are likewise. The point and necessity of this letter is the guitar. Enclosed is a nominal sum for purchase of said instrument. Needless to say Betty and I are deeply grateful for your ^{interest in this} ~~kind of~~ ~~for this~~ matter. Thanks to you and all.

We are studying German from a grammar now. It is called A New German Grammar and the English part is easy going.

Otherwise all is strictly in a rut as to speech.

Thanks again,
Will

Attention: Research & Development Div.

Gentlemen:

For the past few years we have been attempting to develop a method for voice communication over a beam of light. As a result of this work, we have recently devised a new and practical method for accomplishing this purpose. We feel that this system would be a valuable war weapon.

Our preliminary theoretical analysis has shown that we will be able to transmit audio frequencies having a band-width of from 300 to 3000 cycles, with very little attenuation at the upper limit. In addition to securing good intelligibility, we have determined that the system will automatically reject noise, with a resultant excellent signal-noise ratio. The improved signal-noise ratio will permit transmission over a range far exceeding that of ordinary systems.

In order to complete the first working model of this device, we find that we require certain laboratory equipment, which we are at present unable to procure. We have been informed by officials of the Defense Plant Corporation that this equipment is available to private individuals working on government sponsored projects.

Kindly let us know if you are interested in sponsoring such a project. We will be glad to discuss the system in greater detail with your technicians.

Very truly yours,

Alfred Sarant

In reply to your letter of April 7, 1945, we are submitting herewith a rough sketch and brief explanation of our proposed system.

Should you desire further details, or a personal interview, we will be glad to cooperate.

Re: File No. A 13-(3)(6606)

Attention: Mr. J.M. PLUCK

Enclosure:

This is in reply to your letter of June 8, 1945, requesting clarification of several points concerning the theory of our suggested method for voice transmission over a beam of light.

We have made a number of fundamental experiments, proving to our complete satisfaction, the practicability of our system. As stated in our original letter to you dated March 14, 1945, we have been unable to fabricate a model of this system, due to our inability to secure necessary laboratory and model making equipment. With Navy Dept. sponsorship, we will be able to proceed at once, with the development of this model.

The experiments referred to in the above paragraph, and our analysis, centered about a set radiation of the modulation index obtainable with an audio power input of approximately 10 watts. As a result of these experiments, we have concluded that it will be possible to secure a modulation index of 2 or greater. Our unique drives, plus the use of the finest possible equipment, will insure a substantial frequency deviation from the carrier.

Regarding your question concerning frequency shifts of light-transmitted signal, we believe noise from this source will be relatively negligible. Any shifts, to be significant, would have to be of the order of magnitude of the deviation produced by the audio signal. As with the modulation index mentioned, we do not believe it to be a serious problem.

11-3-3

In conclusion, we wish to emphasize our sincere desire as citizens and experienced, graduate engineers, to devote our energy to the successful completion of this project, which we are sure will give our country a valuable war season.

Very truly yours,

Alfred Sarant

Bell Telephone Laboratories
180 Varick St.
New York, N. Y.

Gentlemen:

One of our tenants, Mr. Alfred Sarant, who resides in 65 Morton St., has informed us that he is being sent to Ithaca, N. Y. on a special assignment which will take from three to five months. Inasmuch as he is not giving up his apartment I would like to verify the above fact.

In the past a number of our former tenants, who have left the city, have given me the same sort of story and after they had left I discovered that they had sold their furniture at an exorbitant price and handed their apartments over to people without our consent. This sort of thing has become a racket and we, as one of the owners of property in New York, are trying to put a stop to this practice.

I would, therefore, appreciate very much your telling me whether or not Mr. Sarant is coming back to New York City.

Very truly yours,

Dear Sir:

I have just been advised by the Bell Telephone Laboratories that you left their employ on September 11, 1946, advising them that you were planning to enter the teaching profession. This is in direct contradiction of the story you told me when I saw you at your apartment.

It is very important for me to know immediately when and if you are returning to your apartment. If it is for an indefinite length of time you are going to be away, I shall ask O.P.A. for the right to re-rent it.

Please let me hear from you by return mail.

Very truly yours,

Dear Sir,

Having decided to make permanent residence in Ithaca, I wish to give up occupancy of Apartment 6I at 65 Morton Street effective as of your receipt of this letter.

I am enclosing a check for \$45.50 covering rent for the month of January. My belongings have been removed from the apartment so it is available now for a succeeding tenant.

Yours truly,

Alfred Sarant.
